

# FPT-REMAN Parts

**Resource conservation is the best climate protection!**

**Why REMAN? The REMAN programme, the remanufacturing of used products, not only improves quality but also saves raw materials and costs. Up to 80 percent of raw materials and 60 percent of CO2 pollution can be saved through remanufacturing and that with the same quality and 2-year warranty on all REMAN parts!**

**Cost efficiency with same or higher quality**

**Lower total cost of ownership compared to new parts**

**Sustainable process for the economic cycle**

**2 years / 24 months warranty on all REMAN articles!**
